Installation to a wall

⚠ **All dimensions must be entered in millimeters (mm)**

Enter the **width** of the area you want to cover.
Enter the measurement in the configurator:
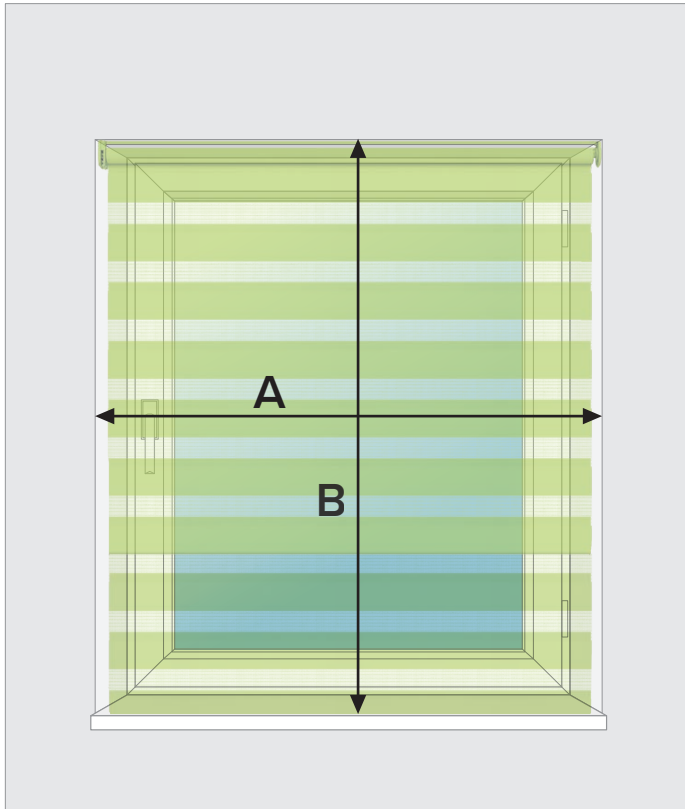

width = A

Note: Mounting brackets extend beyond the material by approximately **22 mm** on either side.

Enter the **hight** of the area you want to cover.
Enter the measurement in the configurator:

hight = B

Note: If you want to cover a larger area, you can give values greater than the measurements.

Mounting in the window recess

> ⚠ **All dimensions must be entered in millimeters (mm)**
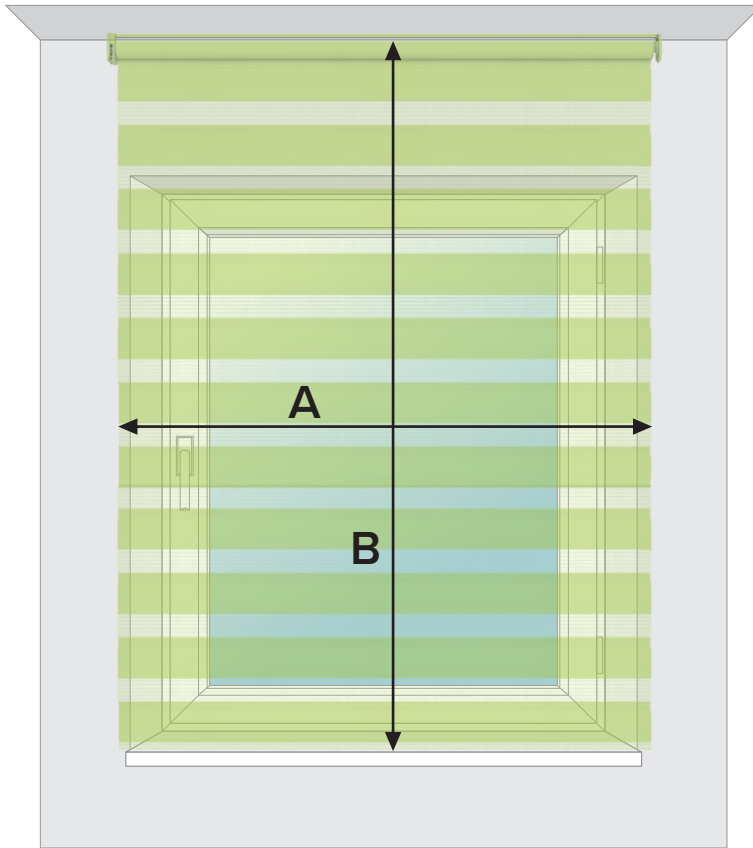

Measure the **width** of the window recess.

Enter the measurement in the configurator:

width = A

Note: Mounting brackets extend beyond the material,which means that the material will be narrower from the recess by about **22 mm** from either side.

Measure the **hight** of the window recess. Enter the measurement value in the configurator:

hight = B

Mounting into the ceiling

⚠️ **All dimensions must be entered in millimeters (mm)**

Enter the **width** of the area you want to cover.
Enter the measurement in the configurator:

width = A

Note: Mounting brackets extend beyond the material by approximately 22 mm on either side.

Measure the **hight** from the ceiling to the window sill.

Enter the measurement value in the configurator:

hight = B

Note: If you want to cover a larger area, you can give values greater than the measurements.
